

Gagné’s 9 Events of Instruction Storyboard

Course name:			Module or lesson name:			Date:		
BEFORE you present the instruction	Event 1: Gain the learner's attention How will you gain the learners' attention? List introductory information, anecdotes, fun facts, etc. that you will use in this course/module intro:	WHILE you present the instruction	Event 4: Present the instruction What will you include in your lecture? What visual materials will you include in your presentation? List the key elements of your delivery (that you can then flesh out into a script and presentation):	AFTER you present the instruction	Event 7: Provide feedback How will you provide your students with feedback? Will you focus on group or individual feedback?			
	Event 2: Tell them what they are going to learn How will you introduce the subject matter of your course/module in an engaging and relevant way? Answer the following questions: Why is this course valuable to my students? What will they take away from it? State the learning objectives:		Event 5: Guided practice What activities and exercises will you include in this course/module to help your students practice their new knowledge or skills?		Event 8: Assess performance Help your students assess their progress. You can provide them with self-assessments tools, e.g. journaling strategies, or you can direct them to an online community of peers. You can also help them understand what real-life tasks employ their new knowledge. How will you help your students assess their performance?			
	Event 3: Stimulate the recall of prior learning How does this course/module fit in with what your students already know? Can they apply familiar learning patterns to it? To place your program in context: - Ask your students about their experiences related to the course/module subject matter - Ask your students about their understanding of related concepts		Event 6: Independent performance What activities and exercises will you ask your students to perform on their own?		Event 9: Extension and transfer Define how you will encourage students to internalize their new knowledge or skills. List ways in which they can apply their learnings to their life and work. Provide further reading or information on follow-up courses/modules if relevant.
