Process/Documentation tool

Phase 1 - Internal Review

Internal (Training/Dev Team)

For Modules:

1. Raw Storyline Modules are uploaded to Review 360

2. Reviewers comment revisions to modules within Review 360

3. Developers make revision in module and reupload Module to Review 360

4. Once revision complete, reviewer marks comment thread for revision "Resolved" in Review 360

5. Once Review 360 comments are all resolved, export CSV of comments for source documentation.

For Assessments:

1. Raw Assessment CSVs are uploaded to Google Drive

2. Reviewers make revisions in CSV and each revision is sent via email to Training Team (us).

3. Developers make revisions in CSVs and post comment back to reviewer to check revision.

4. Reviewer indicates review is complete by commenting "Resolved" back to developer.

5. Once all comments in CSV are resolved, export CSV by selecting "Make a Copy" and checking "Copy comments and suggestions" for source documentation.

External (everyone else)

1. QA Assignments distributed to teams

2. **QA Assignments Checklist** is inserted into Asana with Mike's existing **Project Manager**

3. Once teams' QA is assigned, export CSV from Asana for source documentation.

Phase 2 - Upload to Litmos

At this phase, all modules and CSVs should be completely reviewed with all comments and major revisions resolved. At this phase, Training Team will:

1. package the reviewed modules into SCORM and export the reviewed Assessment CSVs for upload.

2. create Learning Path in Litmos for developers to insert modules and assessments.

3. set Settings for modules and assessments in Litmos.

4. assign modules to QA assignees.

5. notify QA teams when all tasks in this step are completed to being Phase 3.

Phase 3 - QA in Litmos

1.

The QA begins as soon as all reviewed modules and assessments are uploaded in Litmos. QA assignees will input all revisions and edits into the **QA Tracker**. QA Assignees will:

1. select the correct criteria for their name, QA category, etc. in the **QA Tracker**.

2. indicate when they are complete with their QA portion on Asana in **QA Assignments Checklist**.

3. notify Training Team that all edits are in **QA Tracker**.

2.

Devs

When all revisions are complete and in the **QA Tracker**, the Training Team developers will use this document to make the revisions. The Training Team developers will:

1. make revisions to modules and assessments.

2. reupload revised modules and assessments to Litmos.

3. change Status column for each correction in the **QA Tracker**.

4. notify Instructional Designers when revisions are in Litmos and ready for ID QA.

3.

IDers

The Training Team developers will indicate a revision is ready for ID QA by changing the Status of the **QA Tracker**. In the QA, the IDers will:

1. verify all revisions made to the modules and assessments in Litmos.

2. change the Status of the revision in the **QA Tracker**.

a. If Status is Resolved, then the revision is complete.

b. If Status requires further revision, the IDer relates this in the Status and Notes to the developer.

3. checks box verifying when revisions are complete in the **QA Tracker**.

4. notify Project Manager that Training Program is ready for publication.

4.

Once all revisions are complete in the **QA Tracker**, and the course is published, export the **QA Tracker** for source documentation.

Phase 4 - Source Documentation

Source documentation (CSV) acquired from previous steps should contain:

1. All Review 360 Module exports with revision comments;

2. All Assessments CSVs with revision comments;

3. Completed QA Assignment Checklist exported from Asana in CSV; and

4. Completed QA Tracker with all finalized revisions.

Example of Completed Source Document:
